Uncomfortable Questions For Office Seekers

Our elections as currently structured are fully dependent on electronic vote tabulation. **What is your plan should those electronic measures fail?**

Do you have a plan in place to secure and hand count the ballots?

If the voting systems experience massive technical failures such as occurred in Puerto Rico, Arizona, or Texas, are you ready with a backup?

Describe it in detail, please.

How will you audit any of this?

What is your plan to clean up our voter rolls?

Can you verify that each registration is an actual person, instead of a fake entity set up by AI or domestic or international actors with malicious intent?

Can you explain the discrepancies?

What is your plan to secure our election registration and tabulation systems from hacks such as occurred in the fall of 2020?

And if you make it this far, a few bonus questions to see if they're a dolt or not:

Was the 2020 election stolen for Joe Biden?

Did you get the jab, and/or force it onto your children?

Make sure to get them on video and post it wherever you can. Have fun, be nice, but show no mercy.
